

Armour System – Hard Hat Kit

KEY FEATURES:

- Double Laminated
- Self Adhesive
- Almost any hard hat can be made to be Armour equipped
- Unique ID assigned to each kit
- Passive operation

In addition to the Armour Equipped safety vests that SCAN~LINK offers, hard hat kits are also available. The Armour Hard hat kits allow for almost any standard hard hat to be converted in to an Armour equipped piece of apparel. Using the hard hat kit in conjunction with an Armour equipped vest will provide maximum protection.

Each hard hat kit includes a set of 10 RFID tags. These tags are placed in an array on the inside of the hard hat

providing 360 degree protection. Each set of tags has a unique ID. The tags are double laminated to provide improved adhesion and durability. The tags are weatherproof and sweat proof.
